Verkko alustana

Kirjasto 2.0

- Library 2.0 describes a subset of library services designed to meet user needs caused by the direct and peripheral effects of Web 2.0. (Habib 2006)
 - Library 2.0 simply means making your library's space (virtual and physical) more interactive, collaborative, and driven by community needs. Examples of where to start include blogs, gaming nights for teens, and collaborative photo sites. The basic drive is to get people back into the library by making the library relevant to what they want and need in their daily lives...to make the library a destination and not an afterthought. (Houghton-Jan 2005)
 - Library 2.0 is the natural evolution of library services to a level where the library user is in control of how and when she gets access to the services she needs and wants. (Brevik)

Muutos informaatiokulttuurissa

Giger 2007

Isto Huvila 2009 | etunimi.sukunimi@abm.uu.se

Kirjasto 2.0

- The principles of Library 2.0 seek to put users in touch with information and entertainment wherever they may be, breaking down the barriers of space, time and outdated policy. It is a user-centered paradigm focusing on knowledge, experience, collaboration, the creation of new content and encouraging the heart. (Stephens)
 - Library 2.0 is very much influenced by technology-driven, two-way, social interactions between staff and staff or staff and patrons. L2 has provided a framework within which we've been able to re-evaluate virtually every aspect of classical librarianship with the end goal of usability and findability in mind. (Blyberg)
